📁 Portfolio

TECHNICAL SKILLS

Cloud & Orchestration: Docker, Kubernetes, AWS/Azure

Language: Java, Python

Test Automation: Selenium, TestNG, Cucumber, Postman, REST Assured

Infrastructure & Database: Git, MySQL

EXPERIENCE

Goldman Sachs

July 2026 – Present

Analyst

Bengaluru, India

- Engineered automated data governance pipelines using Python and Pandas to monitor data lineage and contract compliance, accelerating regulatory validation cycles by **40%**.
- Developed tracking frameworks to monitor data consumption thresholds and SLA breaches, triggering automated alerts that reduced compliance incident response time by **60%**.
- Built robust data extraction tools utilizing Kerberos-authenticated REST APIs (SPNEGO) to aggregate contract lifecycles, improving data retrieval efficiency by **75%** over legacy systems.
- Automated certification reporting by implementing dynamic aging logic to categorize overdue compliance tasks, decreasing backlogged action items by **35%**.
- Designed multi-dimensional compliance dashboards exported via automated scripts, eliminating manual tracking and reducing weekly reporting overhead by **90%**.
- Streamlined cross-departmental operations by routing targeted remediation follow-ups based on contract version statuses and expiration timelines, boosting operational efficiency by **50%**.

PricewaterhouseCoopers (PwC)

March 2022 – August 2023

Associate 2

Bengaluru, India

- Implemented **Zero-Trust Security** and **Zero-Downtime deployments** via Azure Entra ID and context-aware routing, eliminating incidents and ensuring 99.9% uptime.
- Automated incident management (CAG to ServiceNow), slashing manual ticketing by **80%** and MTTR by **40%**.
- Developed ASP.NET Core and Azure Table Storage multi-tenant REST APIs for high-traffic streamers (Peacock, SkyShowtime).
- Modernized Excel VBA workflows into C# .NET APIs to elevate system performance and maintainability.

PROJECTS

End-to-End E-Commerce Test Automation Suite | Java, Selenium, TestNG, CucumberBDD

- Engineered a comprehensive **automated testing framework** using **Selenium WebDriver** to validate the **end-to-end** functionality of a full-stack e-commerce application (**Spring Boot, React, MySQL**).
- Implemented **Behavior-Driven Development (BDD)** utilizing **Gherkin** to map business requirements to automated test cases for user flows including cart management, checkout, and **Razorpay payment integration**.

RESEARCH

ES-LSTM: Hybrid Model for Financial Forecasting | Python, TensorFlow, Time Series

- Published research in *Digital Finance* (Springer) on a hybrid deep learning model (ES-LSTM) that achieved an R^2 score of 0.9712 on S&P 500 data.
- Engineered a data processing pipeline using Python (Pandas/Statsmodels) to automate data retrieval, noise reduction, and model training for large-scale financial datasets.

EDUCATION

Punjab Engineering College

Aug 2023 – Oct 2025

Master of Technology: Computer Science — CGPA: 7.97

Chandigarh, India

Maharishi Markandeshwar University

July 2018 – May 2022

Bachelor of Technology: Computer Science — CGPA: 9.14

Ambala, Haryana
